

## Digital Signal Processing, Computational Methods and Sensor Networks for Engineering Application

Guest Editors:

**Prof. Dr. Giacomo Capizzi**

Associate Professor. Department of Electrical, Electronics and Informatics Engineering, University of Catania, Viale Andrea Doria 6, 95125 Catania, Italy

**Dr. Grazia Lo Sciuto**

UNICT, Department of Electrical, Electronics and Informatics Engineering (DIEEI), University of Catania, 95125 Catania, Italy

**Dr. Luca Di Nunzio**

Department of Electronic Engineering, University of Rome Tor Vergata, 00133 Rome, Italy

Deadline for manuscript submissions:

**closed (30 November 2023)**

### Message from the Guest Editors

Micro-electro-mechanical systems (MEMS) technology has undergone tremendous evolution in recent decades. Mobile sensor networks are capable of joining different data coming from different sources in order to gather a more complete understanding of a diagnostic context; therefore, such sensors networks provide advanced monitoring solutions. Data for such computation are usually fuzzy, and, using artificial intelligence and numerical methods, it is possible to solve many problems.

The scope of this Special Issue is focused on digital signal processing and sensor networks as well as engineering applications in all kinds of applied scientific and practical problems, such as in signal processing, engineering, physics, biology, economics, etc. The aim is to present different types of applications of soft computations, mathematical modeling and digital signal processing.

Keywords: sensor networks, mobile sensor networks, digital signal processing in sensor networks, digital signal processing, mathematical modeling, optimization problems, numerical methods, inverse problems, heuristic algorithms, artificial intelligence, fuzzy logic

Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
