## Advancing Land Monitoring through Synergistic Harmonization of Optical, Radar and Lidar Satellite Technologies

Guest Editor:

**Dr. Ram C. Sharma**

Department of Informatics,  
Tokyo University of Information  
Sciences, 4-1 Onaridai, Wakaba-  
ku, Chiba 265-8501, Japan

Deadline for manuscript  
submissions:

**31 January 2025**

### Message from the Guest Editor

Land monitoring involves observing, measuring, and analyzing the Earth's surface to understand its characteristics. It's gaining importance due to sustainable resource management, technology advancements, and environmental concerns. Integrating optical, radar, and lidar satellite observations can enhance monitoring accuracy, but challenges exist. Developing algorithms to combine different sensor data and ensuring temporal consistency are primary challenges. Interpreting complex data accurately and improving radar and lidar resolution are also important. Addressing these challenges will enable comprehensive land monitoring, aiding climate response, disaster management, and sustainable environmental practices. Contributions in the form of original articles, reviews, and perspectives are invited from researchers and practitioners working on developing algorithms, improving existing techniques, and applying these methods to diverse geographical regions and ecological settings, offering unprecedented insights into our changing world. We thank you in advance for your contributions to this Special Issue.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
