

Edge/Fog Computing Technologies for IoT Infrastructure

Guest Editors:

Dr. Youngsoo Kim

Department of Computer
Science, Air Force Academy,
Cheongwon-gun 28187,
Chungcheongbuk-do, Korea

Dr. Taehong Kim

School of Information and
Communication Engineering,
Chungbuk National University,
Cheongju, Chungbuk 28644,
Republic of Korea

Dr. Seong-eun Yoo

School of Computer and
Communication Engineering,
Daegu University, Gyeongsan
712-714, Republic of Korea

Deadline for manuscript
submissions:

closed (31 January 2021)

Message from the Guest Editors

This Special Issue seeks recent advancements on fog/edge computing technologies for building an IoT infrastructure. The potential topics of interests for this Special Issue include, but are not limited to the following:

- Fog/edge computing architecture for IoT infrastructure
- Fog/edge computing-based IoT applications
- Dynamic resource and service allocation and installment on fog/edge computing
- Device and service management
- Data management techniques
- Algorithm and technologies for computation offloading on fog/edge computing
- State-aware solutions for fog/edge computing
- Container orchestration frameworks based on open source projects
- Container orchestration techniques such as real-time monitoring, auto-scaling, and load balancing of services
- Experimental testbed for fog/edge computing-based IoT application
- Performance analysis and evaluation on fog/edge computing
- Standards on fog/edge computing
- SDN/NFV techniques
- AI and deep learning techniques
- Security and privacy

sensors

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
