Message from the Guest Editors

Dear Colleagues,

In this Special Issue, we invite original research papers and review articles that explore new techniques, solutions and applications in e-health and mobile health monitoring. Topics of interest include but are not limited to:

- Wellness-oriented and citizen-centric mobile healthcare systems
- Remote and mobile health monitoring innovations and case studies
- Wearables and IoT sensors for health monitoring
- Big data and analytics in health monitoring across edge and cloud
- Applications of artificial intelligence in e-health
- Explainable medical artificial intelligence
- Internet and networked solutions for superior healthcare delivery
- Web 2.0/3.0 in e-health systems
- Management of information and knowledge in integrated health monitoring systems
- Electronic medical records as the basis for e-health solutions
- E-health standards and policies for healthcare delivery and monitoring
- Designing future healthcare organizations, systems, and processes in e-health
- Privacy, security, and trust issues with e-health solutions

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
