Message from the Guest Editors

Dear Colleagues,

The integration of the Internet of Things (IoT) and artificial intelligence technologies have enabled novel types of applications and services, referred to as Intelligent IoT (IIoT) systems, which can be applied in different domains, such as smart cities, building automation, transportation and logistics, healthcare, and crisis management.

In this Special Issue, we welcome novel contributions on the following set of topics of interest, including but not limited to:

- Applications of modeling and simulation for engineering IIoT systems
- Trade-off analysis at IIoT architectural level considering quality attributes, such as security, performance, scalability, etc.;
- Engineering of IIoT systems in
 - smart buildings, e.g., systems managing energy consumption
 - smart city e.g., systems providing mobility planning and traffic adaptation services in dynamic contexts
 - intelligent and autonomous systems, such as self-driving vehicles
 - crisis management (including monitoring, prevention, response management, or recovery).

(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
