

Sensors and Artificial Intelligence for Analyzing Human Behavior in Sports and Physical Activity

Guest Editors:

Dr. John Komar

Physical Education and Sports Sciences, National Institute of Education, Nanyang Technological University, 1 Nanyang Walk, Singapore 637616, Singapore

Prof. Dr. Ludovic Seifert

CETAPS Lab., Faculty of Sport Sciences, University of Rouen, Boulevard Siegfried, 76821 Mont Saint Aignan CEDEX, France

Deadline for manuscript submissions:

15 October 2024

Message from the Guest Editors

Dear Colleagues,

The rapid development of motion sensors now allows the collection of data out of the laboratory during training but also during competitive events. Although the data availability and/or data accuracy may be lower compared to a laboratory-based analysis, the possibility to collect data live in the performance context appears key to obtaining relevant insights into the activity of the performers. As such, the benefits of an in situ analysis of the performers is the result of a constant balance between the raw data that can be captured in situ, the accuracy and reliability of those data, and the possible analysis to be performed to really access insights into the performance. On the other hand, advancements in computer vision and body pose estimation also today allow the collection of positional and kinematics data on every player without the need to wear sensors.

We welcome the submission of basic and applied research studies, tutorials, reviews, and position papers that address the use of motion sensors in physical activity and sports sciences.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
