Challenges and Future Trends of Artificial Internet of Things

Guest Editors:

Prof. Dr. Dapeng Wu

School of Communication and Information Engineering,
Chongqing University of Posts and Telecommunications,
Chongqing 400065, China

Dr. Zhidu Li

School of Communication and Information Engineering,
Chongqing University of Posts and Telecommunications,
Chongqing 400065, China

Dr. Boran Yang

School of Artificial Intelligence,
Chongqing University of Technology, Chongqing 400054,
China

Deadline for manuscript submissions:

20 January 2025

Message from the Guest Editors

In recent years, scholars and industry experts have proposed integrating AI and cloud–edge–terminal collaborations into a highly functional underpinning infrastructure for intelligent IoT applications. Artificial intelligence of things (AIoT) has become a hot research area to realize real-time information acquisition through IoT sensors and perform intelligent data analysis tasks anywhere along the terminal–edge–cloud continuum, to form a smart and enabling ecosystem that brings not only extensive economic benefits but also social welfare.

Although the de facto AIoT solutions have been deployed in many application fields (smart homes, smart cities, eHealth services, auto-piloting vehicles, industrial control, etc.), there are some scientific and technical issues regarding the unique features of AIoT, including communication protocols, resource management, task assignments, data analytics, network security, etc. To address the challenges in these directions, effective and efficient technologies are urgently needed for AIoT.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
