Message from the Guest Editors

In this Special Issue, we propose to focus on detection technologies, devices, and signal processing for the dynamic measurement of gas molecules, to monitor patients over time in order to control the disease. Combining high sensitivity with high temporal resolution, measuring traces in real time, and multiplexing several gaseous biomarkers are complex technological challenges. Innovations in sensor technologies, medical device concepts, signal processing, dynamic models, and experimental validations are expected.

Keywords:

- volatilome
- exposome
- metabolome
- wearable
- nearable
- health monitoring device
- gas sensor
- dynamic modeling
- time-varying signal processing
- statistical analysis

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
