Message from the Guest Editor

This Special Issue aims to gather the variety of pros and cons of the different technologies, along with the solutions adopted by the designers working on different applications, in order to highlight the improvements in the development, testing, and modeling of state-of-the-art magnetic sensors.

Therefore, we welcome the submission of articles reporting recent advances in sensor materials, sensor properties, sensor device concepts, sensor fabrication and testing techniques, calibration and control systems, as well as closely related topics.
