Message from the Guest Editors

Dear Colleagues,

This Special Issue deals with the problems, challenges, and potentials of the field of smart homes from the perspective of human–computer interaction and spans the spectrum from social science questions of acceptance and value systems to classical questions of system operation (usability) and the application of artificial intelligence (configuration, recommendation systems).

The topics include (but are not limited to):

- User Experience in Smart Homes
- Technology Acceptance of Smart Home Systems
- Societal Impact of Smart Home Systems
- Control Interface Issues
- Static Configuration Interface Issues
- Dynamic Configuration Interface Issues (Rule Definition)
