Artificial Intelligence-Enabled Security and Privacy for IoT

Guest Editors:

Dr. Antonio Muñoz

Ampliación Campus de Teatinos,
Universidad de Málaga, 29071
Málaga, Spain

Dr. Alexandru Vulpe

Telecommunications
Department, University
Politehnica of Bucharest,
Bucharest, Romania

Deadline for manuscript
submissions:

closed (29 February 2024)

Message from the Guest Editors

AI is currently driving transformations in various fields, including cybersecurity, which is another cross-cutting discipline. However, data protection, data quality and adversarial attacks that exploit vulnerabilities in AI systems are on the rise. AI can also be used to create more sophisticated attacks that trigger an AI arms race between defenders and attackers. To effectively use AI in the cybersecurity domain and address these challenges, novel ideas and effective approaches need to be explored. Measures of different types need to be applied without losing sight of the fact that the basics of software engineering must remain during all phases in the secure software lifecycle. This Special Issue aims to collect contributions by leading researchers both from academia and industry, show the latest research results in the field of IoT monitoring, security and privacy and provide valuable information to researchers as well as practitioners, standards developers and policymakers. Its aim is to focus on the research challenges and issues in IoT security. Manuscripts regarding novel algorithms, architectures, implementations and experiences are welcome.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
