Message from the Guest Editors

This Special Issue aims to address all types of methodologies, data processing, and testing techniques for advanced sensing technology for application in moving-magnet planar motors. Both original manuscripts and review manuscripts are welcome.

Topics of interest include, but are not limited to:

- Advanced sensing frameworks for moving-magnet planar motors;
- Advanced sensors for moving-magnet planar motors;
- Sensor error modeling and online calibration for moving-magnet planar motors;
- Sensing circuits or architectures for moving-magnet planar motors;
- Sensing signal processing for moving-magnet planar motors;
- Other emerging sensing applications for moving-magnet planar motors.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
