Sensors for Continuum, Soft and Compliant Robotics

Guest Editors:

Dr. Guangbo Hao

Dr. Jieyu Wang

Dr. Haitong Liang

Dr. Yinjun Zhao

Deadline for manuscript
submissions:

25 February 2025

Message from the Guest Editors

Soft and compliant robotics, with their exceptional flexibility and adaptability, excel in a multitude of intricate applications, such as navigating through unstructured environments, manipulating fragile objects, executing precise motion, and serving as deformable components in advanced space/aerospace systems. However, their nonlinear deformations and/or motion range limitations (such as in micromotion-compliant robotics) can make it arduous to comprehensively monitor the robots' kineto-static and dynamic states. This lack of accurate sensory feedback hinders enhancements in operational precision, comprehensive shape control, and the safety of robotic operation. This is therefore a critical bottleneck that demands innovative solutions.

In light of this, our upcoming Special Issue of *Sensors* seeks contributions that highlight recent progress and ongoing challenges in sensor design, manufacture, and implementation for soft/compliant robotics as well as adaptive structures.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
