Non-contact Sensing Technologies for Motion Analysis and Health Monitoring

Guest Editors:

Dr. Ennio Gambi

Dr. Gianluca Ciattaglia

Dr. Agnese Sbröllini

Dr. Linda Senigagliesi

Deadline for manuscript
submissions:

30 October 2024

Message from the Guest Editors

Dear Colleagues,

There has been a great deal of research on the use of contactless sensors to monitor people's health and motion, with the aim of improving their quality of life. Subject monitoring encompasses a wide range of applications, involving the use of extremely differentiated sensor technologies capable of monitoring many aspects of people's health. In this context, various sensor technologies can be leveraged to obtain such information. These can be obtained from contact or noncontact sensing, directly from sensors, by applying signal processing techniques or machine learning and deep learning approaches. Since the recognition of human health characteristics can be crucial to improving and preserving people's lives, the progress of the technologies in this field is extremely exciting and pioneering.

This Special Issue intends to collect contributions of the most recent research in the context of people motion and health monitoring based on contactless technologies.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
