### Message from the Guest Editors

This Special Issue invites original research papers and review articles covering all aspects of the damage assessment (destructive and non-destructive) and structural health monitoring of composites, including fibrous and particulate composites. Both experimental and numerical studies are welcome. Manuscripts focusing on the application of damage assessment and health monitoring techniques in sustainable composites, as well as concise reviews of specific techniques used to manage the health condition of composites, are particularly encouraged.

Potential topics include, but are not limited to:

- composites
- damage assessment
- structural health monitoring
- multifunctional composites
