Neck Surgery, University of
Pennsylvania, Hospital of the
University of Pennsylvania

Deadline for manuscript
submissions:

closed (31 July 2022)

Message from the Guest Editors

Dear Colleagues,

Medical diagnostic techniques began with human senses and have evolved to include ever more sophisticated electronic wave form analysis, blood and bodily fluid testing, ultrasonic, and radiographic and genetic techniques (to name a few). The senses of taste and smell were among the earliest diagnostic tools, described by the earliest physicians, and yet they remain tantalizingly underused. This Special Issue of *Sensors* will be devoted to articles describing diagnostic applications of electronic taste and smell sensing in medical and veterinary care using chemical, gas, optical, electrical, biological/cellular, and other novel technologies. Submissions may focus on screening for disease, diagnosing disease or monitoring the course of/response to treatment of disease.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
