Trends and Prospects in Medical Hyperspectral Imagery

Guest Editors:

Dr. César Sanz

Universidad Politécnica de Madrid, Madrid, Spain

Dr. Eduardo Juárez

Universidad Politécnica de Madrid, Madrid, Spain

Dr. Miguel Chavarrías

Universidad Politécnica de Madrid, Madrid, Spain

Deadline for manuscript submissions:

closed (30 April 2021)

Message from the Guest Editors

Hyperspectral Imaging (HSI) is a technology to identify and estimate the distribution of materials within a captured scene based on the measured surface reflectance at each spectral band. Although initially aimed at remote sensing applications, there is a growing research interest to perform in vivo HSI processing during surgeries to help in discerning between cancerous and healthy tissues and locating tumor margins.

The aim of this Special Issue is to introduce to the remote sensing community results and applications of the Hyperspectral Imaging field into medical research. The goal is to provide beyond-state-of-the-art solutions to the challenge of building decision support tools for personalized medicine. Therefore, contributions such as integration of HSI with MRI or IOUS, real-time mapping of brain tumors, intraoperative immersive classification, bio-inspired classification algorithms, in vitro and ex vivo HSI analysis from resected samples or high-performance real-time HSI processing platform implementations, among others, are expected.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
