2. Engineering Research Center for Semiconductor Integrated Technology, Institute of Semiconductors, Chinese Academy of Sciences, Beijing 100083, China

Deadline for manuscript submissions:

**closed (20 January 2023)**

### Message from the Guest Editor

MEMS sensors have attracted a lot of research. For example, differential pressure sensors have achieved a resolution of 1.3 mPa, while resonant pressure sensors with a 2 MPa measuring range have an accuracy of 0.01%. Small-size MEMS pressure sensors can inspect blood pressure in vessels. The Allan deviation zero bias instability of MEMS accelerometers can be less than 1 micro gravity acceleration. The zero point drift of MEMS gyro can be better than 0.01°/h. Single gold atoms ( $\sim 3 \times 10^{-22}$  g) can be weighted using a carbon nanotube cantilever. The min. magnetic field noise is about 36 pT/Hz<sup>(1/2)</sup>, and a resolution of 5 nT was achieved in the Fe–Co–B-based amorphous ribbon. MEMS resonators have extensive usable frequency ranges from a few Hz to several THz. The interaction between molecules with am fN force level can be detected using MEMS sensors. The detection of single DNAs, proteins, viruses, and cells has been enabled with MEMS bio-/chem-sensors. This SI discusses issues associated with the updated frontier of MEMS sensors, such as theory, material, preparation, measurement, and application.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
