Metal-Organic Frameworks for Various Sensing Applications

Guest Editor:

Prof. Dr. Ki-Hyun Kim
Department of Civil and Environmental Engineering, Hanyang University, Seoul 04763, Republic of Korea

Deadline for manuscript submissions:
closed (31 May 2019)

Message from the Guest Editor

A metal organic framework (MOF) represents a new class of hybrid material built from metal ions with well-defined coordination geometry and organic bridging ligands. Over the past few years, MOFs have attracted a great deal of attention, owing to their intriguing framework architecture, topology, and optical properties. MOFs have provided promising perspectives in various research fields such as catalysis, energy storage, drug delivery systems, nonlinear optics, and gas storage. Recently, the application of MOFs has been further extended to cover new and interesting fields for the sensing of various target components, including small molecules, solvents, pesticides, explosives, and biological markers. In this special issue, I invite contributions from scientists who are actively involved in research related to MOF and sensing principles.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
