Message from the Guest Editors

Dear Colleagues,

This Special Issue will focus on noble results in microwave and RF biosensors, biosensing device application, biosensing platforms, etc. Microwave and RF biosensors and bio devices of biological solutions, which have been investigated for several decades though different biosensing applications, are crucial to future biosensor research. Scopes are related to experimental and theoretical research in microwave and RF biosensors, microwave and RF biosensor devices, microwave passive and active biosensor devices, microwave and RF biosensor platforms, microwave and RF biosensing applications, hybrid RFIC applications for biosensors, and MMIC applications for biosensor.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
