Message from the Guest Editor

Dear Colleagues,

This Special Issue addresses novel ideas, technologies, and challenges related to microwave sensing. It gathers the latest developments from ongoing and rapidly evolving research projects with a special emphasis on dielectric characterization of material and samples, microwave biosensing, and unobtrusive monitoring of moving targets spanning from healthcare to agritech applications. Potential topics include but are not limited to the following:

- Autonomous, minimally invasive monitoring;
- Biosensors for cell and/or subcellular sensing;
- CMOS integrated circuit, on-chip systems, lab-on-chip;
- Dielectric characterization and impedance sensing;
- Localization, angle-of-arrival, and received signal strength indicator detection;
- Novel microwave measurement and readout (e.g., machine learning enhanced) approaches;
- Radar, doppler, and micro-doppler signatures;
- Wireless sensing in sensor networks and Internet of Things settings;
- Wearable and implantable microwave devices.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
