Perception, Planning and Control of Marine Robots

Guest Editors:

Prof. Dr. Rongxin Cui

School of Marine Science and Technology, Northwestern Polytechnical University, Xi'an 710072, China

Prof. Dr. Zhouhua Peng

College of Marine Electrical Engineering, Dalian Maritime University, Dalian, China

Deadline for manuscript submissions:
closed (20 August 2023)

Message from the Guest Editors

Dear Colleagues,

Marine robots, such as surface vessels, underwater vessels, have been widely used for ocean monitoring, survey, search and rescue tasks. Perception, planning and control play an important role when performing such tasks. This special issue will focus on the use of sensors to address marine robotic challenges in the complex ocean environment, dealing with both the scientific foundations of sensors and their use and applications on marine robots.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
