Mobile Crowdsensing in Smart Cities

Guest Editors:

Dr. Federico Montori

Dipartimento di Informatica -Scienza e Ingegneria, Università di Bologna, Mura Anteo Zamboni 7, 40126 Bologna, Italy

Prof. Dr. Luciano Bononi

Department of Computer Science and Engineering, University of Bologna, Bologna, Italy

Prof. Dr. Prem Prakash Jayaraman

Faculty of Science, Engineering & Technology, Swinburne University of Technology, 1 Alfred Street, Hawthorn, VIC 3122, Australia

Deadline for manuscript submissions: closed (20 November 2022)

Message from the Guest Editors

Mobile Crowdsensing (MCS) is a novel paradigm that leverages the collective awareness of a crowd so that a phenomenon of common interest can be monitored through the aggregation of information collected from personal mobile devices. While MCS application to Smart Cities is impeded by several challenges. These include: 1) efficient recruitment of users, which is a hard task. particularly because of the privacy restrictions that limit the exchange of information; 2) dealing with "the curse of sensing", i.e., the tendency of MCS to collect data that in certain locations may be too sparse, leading to a poorly described phenomenon; 3) effective mechanisms for rewarding users to encourage participation; and 4) testbeds and techniques for testing large-scale MCS applications in situ, which is highly relevant to the research community given the challenge of involving a high number of people in data collection.

- application of mobile crowdsensing to smart cities
- mobile and pervasive crowdsensing testbeds and experiences
- large-scale environmental monitoring
- privacy preservation
- recruitment
- mobile-edge computing

Editor-in-Chief

Message from the Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE,

PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
