### Message from the Guest Editor

Dear Colleagues,

Over the past decade, carbon nanomaterials have emerged as sustainable and cost-effective tools at the nanoscale. These materials have garnered significant attention owing to their versatile physico-chemical and optical properties. Carbon nanomaterials have found widespread use in a myriad of applications most importantly as imaging tools and sensing probes.

*Sensors* is dedicated to the publication of cutting edge research in imaging and sensing applications. Given the rise in interest in carbon nanomaterials in these areas, the guest issue will fall perfectly within the scope of the journal's mandate, i.e., the communication of top level and urgent science.
