## Noninvasive Sensors for Biomedical Application

Guest Editors:

**Dr. Jinhui Yuan**

**Dr. Qiang Wu**

**Prof. Dr. Gerald Farrell**

**Dr. Dejun Liu**

Deadline for manuscript  
submissions:

**closed (25 August 2023)**

### Message from the Guest Editors

Dear Colleagues,

Noninvasive sensors mostly utilize samples of human breath, sweat, tears, saliva, and other body fluids. Through noninvasive and continuous screening of biochemical markers in the human body, disease prognosis, diagnosis, management, and health supervision can be realized. Many have been put into daily use, including blood glucose detection, electroencephalogram sensing, and so on. Current research focuses range from common metabolites or electrolytes to more challenging biomarkers, including those found in sweat, for applications such as the detection of alcohol or low concentrations of uric acid and tyrosine.

This Special Issue will explore noninvasive sensors' biomedical applications. Papers may address a wide range of noninvasive sensor applications, including, but not limited, recent developments in the following fields: electrochemical noninvasive sensors, optical noninvasive sensors, microfluidic chip noninvasive sensors, and noninvasive biosensors, and their applications in medical diagnosis, health monitoring, and so on.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
