Optical Thermometry: Concepts, Methods, and Applications

Guest Editors:

Dr. Liwang Liu

Laboratory for soft matter and biophysics, Department of physics and astronomy, KU Leuven, 3001-Heverlee, Belgium

Prof. Dr. Ping Lu

School of Optical and Electronic Information, Huazhong University of Science and Technology, Wuhan 430074, China

Dr. Yovan de Coene

Chemistry, KU Leuven, Leuven, Belgium

Deadline for manuscript submissions:

closed (31 May 2023)

Message from the Guest Editors

Temperature is one of the fundamental thermodynamic quantities of many particle systems and plays a key role in the behavior of matter. Its measurement is ubiquitous in scientific research and industrial applications. Hence, developing novel sensors for temperature monitoring has long been an active and dynamic field of research. Optical thermometry allows optical read outs of local temperature and is able to circumvent many of the challenges and limitations encountered in other traditional thermometry techniques, which are mostly based on contact electrical resistance probes. Optical thermometry possesses the advantages of noncontactness and corrosion resistance, high accuracy and fast response, and multiplex and high-resolution imaging capacity.

This Special Issue addresses the state-of-the-art research on optical thermometry, with emphasis on technical concepts, instrumentation, implementation, calibration algorithm, and novel applications. Topics of interest include but are not limited to both development and application aspects, thermometry or temperature sensing based on fluorescence or photoluminescence, fiber-optics, and photonic bandgap

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
