Message from the Guest Editors

This Special Issue invites researchers to submit both reviews and original research manuscripts in the field of blood oxygenation measurements. The articles may consider the technical and/or clinical aspects of oxygen supply-to-tissue measurement. The technical/methodological aspects are not restricted to the optical techniques of oximetry and NIRS—other methods are also of interest. The clinical applications of oxygen saturation measurements are important primarily for patients undergoing oxygen supplementation, in particular preterm newborns, but other applications are welcome as well.

Deadline for manuscript submissions:

10 September 2024

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
