

Physiological Signal Sensing for Mental Health Monitoring and Management

Guest Editor:

Dr. Toshikazu Shinba

Department of Psychiatry,
Shizuoka Saiseikai General
Hospital, Shizuoka 422-8527,
Japan

Deadline for manuscript
submissions:

closed (30 September 2023)

Message from the Guest Editor

The research topics cover mental disorders including depression, anxiety, stress-related disorders, schizophrenia, developmental disorders, dementia, sleep disturbances, and delirium. The researches on mental health in the normal population are also suitable.

In the research, it is preferred to assess and discuss the interventions for ameliorating and treating the mental symptoms depending on the results of the physiological signal processing. The interventions may be physical (ex. brain stimulation), pharmacological, behavioral, and psychological. The studies using neurofeedback and brain-machine interface are welcome. Human basic studies and animal studies which aim to develop the monitoring and management systems are also appropriate.

Keywords: physiological sensors; real-time monitoring; therapeutic intervention; electroencephalogram; event-related potential; slow potential; heart rate variability; skin conductance; pupil size; gut movement; cerebral blood flow; electromagnetic stimulation; mental health

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
