Message from the Guest Editors

Dear Colleagues,

Electrochemical sensors are a popular class of sensors used for the detection of various kinds of analytes. Electrochemical sensors are widely used to detect biomolecules, volatile organic compounds, explosives, toxic metal, etc., providing highly accurate and specific sensing responses for analyte identification. Extensive research aiming to improve electrochemical sensing technology is ongoing, including efforts to develop sensing elements, electrodes for cost-effective devices, electrode patterns and sensory arrays. This Special Issue presents an opportunity for the research community to publish original research findings related to all fields involving electrochemical sensors.
