Message from the Guest Editors

The Special Issue is dedicated to remote sensing applications for water quality for inland and coastal waters with particular emphasis on methodology derived from the new generation of sensors and instruments. Contributions that cover long time periods, and/or large geographical extents are especially welcome. Studies should rely on the integration between earth observation imagery and data collected in the field.

- Hyperspectral sensor
- Calibration/validation activities
- Monitoring water quality status
- Algorithms
- Satellite data processing

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
