Message from the Guest Editor

Dear Colleagues,

Robotics is now a long-established discipline. It has different possible and successful application fields such as industry, health and well-being, manufacturing, etc. In the last 20 years, as robots became more affordable and available in different environments, they have been used in educational contexts. These tools have shown to be successful in this field, especially to facilitate the acquisition of competences related to computational thinking, problem solving, teamwork, etc.—what are now known as 21st century skills.

This Special Issue is devoted to exploring this field, taking into account the following topics:

- Innovations in the application of robotics in education;
- Good practices for the use of robotics in education;
- Studies on the most common devices, robots, sensors, or actuators applied for educational purposes;
- Case studies about the application of robotics in education

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
