Message from the Guest Editors

Dear Colleagues,

With the global connectivity services/applications needs that are yet to be accommodated, such as ubiquitous communication, smart transportation, smart city, maritime surveillance, and disaster rescue, terrestrial networks and computing alone cannot meet the needs in an effective and efficient manner. Space-air-ground computing, as an integration of satellite systems, aerial networks, terrestrial communications, and Cloud computing has been becoming an emerging computing architecture and attracting intensive research interest.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
