Message from the Guest Editors

This Special Issue aims to provide a comprehensive overview of the state of the art of wearable sensor development and application in Canada. We invite research articles that profile the broad spectrum of topics related to wearable sensors from technology and platform development, data analytics, data management, or security/privacy to the use of wearable technology across health care, workplace and sport/performance applications. Applied studies can range from population studies to feasibility or case series. Studies that focus on knowledge translation, implementation, and evaluation of wearable sensor technology are also encouraged. This Special Issue will publish high-quality research papers and review manuscripts.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
