Deadline for manuscript submissions:
closed (31 May 2018)

Message from the Guest Editors

Dear Colleagues,

The goal of this special issue is to highlight state of the art applications of software-defined networking based mobile networks. The topics of this special issue include (but not limited to): novel architectures and protocols, service discovery and content caching models, context-aware controller placement optimization, orchestration across computation, storage and communication resources, QoS/QoE-aware end-to-end routing selection, energy-aware load balancing and scheduling, security and privacy-preservation, 5G applications, big data applications, testing and evaluation tools of software-defined networking based mobile networks.

We invite you to submit original unpublished work on the listed or related topics.

Dr. Mianxiong Dong
Dr. Jun Wu

Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
