### Message from the Guest Editors

Dear Colleagues,

I would like to interest you in this Special Issue on “Sensing Technology and Data Interpretation in Machine Diagnosis and Systems, Part 2” at *Sensors* and cordially invite you to submit your articles. The purpose of this second edition Special Issue is to compile studies on knowledge, research practice, and forecast development trends in the field of machine and system diagnostics, with particular emphasis on measuring systems and signal processing methods to extract useful information. The dynamic development of the Smart concept in all engineering areas indicates the need for the consolidation and exchange of knowledge in this area, for which this Special Issue is an ideal platform. Taking this into account, it was decided to launch a second edition of this Special Issue in order to showcase the development and new applications.
