

New Trends on Sensor Devices for Space and Defense Applications

Guest Editors:

Dr. Pietro Bia

Prof. Dr. Luciano Mescia

Dr. Diego Caratelli

Dr. Antonio Manna

Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editors

Worldwide investment in novel technology for defense and space applications is growing.

The requirements in terms of high-performance devices working in extreme physical conditions represent a challenging design for the scientific and technical community. Such devices have to be designed ad-hoc depending on the application and the physical working condition.

Several applications in space and defense require sensors regarding a wide range of physical domains, ranging from the electromagnetic spectrum (i.e., antennas, optical and gamma ray sensors) to thermal measurement and movement and gravitational waves.

The aim of the Special Issue is to present the state-of-the-art of sensor devices for space and defense purposes.

- Antennas;
- Fiber optic;
- Optical devices;
- Hyperspectral sensors;
- Radiation hardened sensors;
- Thermal sensor;
- Movement gyroscope;
- Gravitational wave antenna;
- Remote sensors;
- Physical sensors;
- Cooperative sensors.

Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
