### Message from the Guest Editors

Dear colleagues,

This Special Issue aims to gather recent research findings and technology developments toward the conceptualization and realization of future mobility systems in the smart city context. We invite contributions on a broad range of topics, from the networking and processing of sensor data to the novel architectures and applications related to smart cities and future mobility.

Particular topics of interest include, but are not limited to:

- smart cities;
- mobility and transport;
- wireless sensor networks;
- Internet of things;
- connected and automated mobility;
- intermodal urban mobility;
- vehicular networks;
