Deadline for manuscript submissions:
closed (30 September 2022)

Message from the Guest Editors

Dear Colleagues

Human activity recognition (HAR) has been playing an increasingly important role in the digital age.

Having been studied and verified adequately, traditional sensors suitable for human activity recognition—such as external sensors for smart homes, optical sensors like cameras for capturing video signals, and bioelectrical and biomechanical sensors for wearable applications—continue to be researched in-depth for more effective and efficient usage, among which specific areas of life facilitated by sensor-based HAR have been continuously increasing.

This Special Issue aims to provide researchers in related fields a platform to demonstrate their unique insights and late-breaking achievements, encouraging authors to submit their state-of-the-art research and contributions about sensors for HAR.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
