### Message from the Guest Editors

Dear Colleagues,

There is an increasing interest in indoor positioning due to the rapid growth of location-aware applications, such as city recommending systems and robot navigation. This Special Issue will address localization and tracking leveraging the power of sensor fusion based on recent techniques. This includes positioning, tracking, indoor mapping, and location-aware applications.

Topics of interests include but are not limited to the following:

- Simultaneous localization and mapping in robotics;
- Emerging sensors for indoor localization and tracking;
- Sensor fusion techniques on localization and tracking;
- Machine learning for indoor localization;
- Localization and tracking for the Internet of Things;
- Location-based services and applications.
