Message from the Guest Editors

Dear Colleagues,

Different types of sensors are widely used in smart cities in different fields: intelligent public lighting, smart grids/microgrids and nanogrids, renewable energies, electric vehicles, autonomous navigation systems, health monitoring systems, materials, brain-machine interfaces, imaging technologies, etc. These sensors are divided into three categories: 1) classical sensors; 2) quantum sensors; 3) smart sensors. These sensors can be wired or wireless.
