## Synthesis and Sensor Applications of Hybrid Bionanomaterials

Guest Editors:

**Prof. Dr. Gang Wei**

College of Chemistry and  
Chemical Engineering, Qingdao  
University, Qingdao 266071,  
China

**Prof. Dr. Tibor Hianik**

Faculty of Mathematics, Physics  
and Informatics, Comenius  
University, Mlynská dolina F1, 842  
48 Bratislava, Slovakia

Deadline for manuscript  
submissions:

**closed (31 May 2021)**

### Message from the Guest Editors

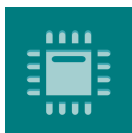

Dear Colleagues,

The design and synthesis of structure- and function-specific nanomaterials has made great contributions to the development of novel sensors and biosensors for various applications in biomedicine, food analysis, environmental monitoring, gas sensing, and others. Recently, more efforts have been made to create hybrid bionanomaterials for promoting their sensor applications. For instance, many biological molecules like DNA, proteins, peptides, enzymes, viruses, and biopolymers have been combined with other functional nanomaterials such as carbon nanotubes, graphene, graphene-like two-dimensional materials, nanoparticles, quantum dots, and some others to form functional hybrid bionanomaterials, which have also shown wide applications for the fabrication of electrochemical, electronic, fluorescent, spectroscopic, colorimetric, and mechanical force sensors for the detection of metallic ions, drugs, small molecules, biomacromolecules, cells, cancer biomarkers, and gases.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access :** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
