Department of Physical Education and Sports, Faculty of Educational Sciences, Universidad de Sevilla, 41013 Seville, Spain

Dr. Alejandro Muñoz-López

Department of Human Motricity and Sports Performance, University of Seville, Seville, Spain

Deadline for manuscript submissions:
closed (30 August 2023)

Message from the Guest Editors

The science behind the application and innovation of new training methods is being improved due to the development of new technology. This technology provides new insights into modern ways to analyze human performance in sports but is also recognized as one of the primary therapeutic targets of interventions in older adults and clinical populations. Over the past few years, different resistance training equipment and new methods have been developed incorporating more objective and portable devices to measure physical fitness. The incorporation of these devices facilitates the use of standardized and feasible assessment protocols, allowing the identification of strength and muscle power patterns in daily practice. This Special Issue aims to provide new insights into the use of technology to understand and monitor physical performance during resistance training in different populations. Articles addressing this topic, more specifically on implementing new analysis on daily routines, are welcome.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
