Advances in Tactile Sensing and Robotic Grasping

Guest Editor:

Dr. Jun Yang

Chongqing Institute of Green and Intelligent Technology, Chinese Academy of Sciences, Chongqing 400714, China

Deadline for manuscript submissions:

closed (31 December 2022)

Message from the Guest Editor

Dear Colleagues,

Tactile perception, force feedback and intelligent grasping are the basics of intelligent robots. The development of tactile sensing devices and sensing technology is greatly promoting the ability of robots to be competent for various complex object recognition and grasping operations. However, compared with the human hand, there is still a huge gap between the existing tactile sensing and feedback control technologies. Therefore, the development of human-like tactile sensing devices, tactile recognition algorithms and tactile feedback control technology is the only way to improve robotic intelligence. This special issue focuses on novel tactile sensors, tactile perception, force feedback control and their applications in robotic grasping.

Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
