submissions:

20 November 2024

Message from the Guest Editors

Recently, transportation infrastructures have been extensively tested using non-destructive (NDT) and structural health monitoring (SHM) technologies based on green and intelligent needs. Therefore, the aim of this Special Issue is to collect recent research advances and progress in NDT and SHM in the fields of transportation infrastructure. Additionally, papers focusing on maintenance management systems, life-cycle assessment and asset assessment of transportation infrastructures are also welcome. Topics of interest include, but are not limited to:

1. Innovative NDT of transportation infrastructures;
2. Recent developments in existing NDT technologies, including GPR, FWD, etc.;
3. Remote sensing techniques for damage identification;
4. The modeling of infrastructure performance based on NDT or multi-source data;
5. Green and intelligent sensors and networks for road structural monitoring;
6. Damage evaluation using artificial intelligence and deep learning;
7. Pavement dynamic monitoring using accelerated loading testing;
8. Unmanned aerial vehicles for road extraction and 3D modeling;
9. Life cycle assessments on transportation infrastructures based on NDT tests.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
