

Micro-Nano Systems Technology and Micro-Nano Intelligent Manufacture

Guest Editors:

Prof. Dr. Tao Dong

Institute for Microsystems - IMS,
Faculty of Technology, Natural
Sciences and Maritime Sciences,
University College of Southeast
Norway, Postboks 235, 3603
Kongsberg, Norway

Prof. Zhaochu Yang

Institute of Applied Micro-Nano
Science and Technology,
Chongqing Key Laboratory of
Micro-Nano Systems Technology
and Smart Transducing,
Chongqing Technology and
Business University, Nan'an
District, Chongqing 400067,
China

Message from the Guest Editors

The goal of this Special Issue is to highlight the recent progresses on advanced micro- and nano systems as well as their intelligent manufacture with emphasis on applications in health care, environment, food industry and energy, electronics communications, among others. Of special interest is research work addressing real-time and continuous signal processing and detection, modelling and simulation in micro and nano systems, microfabrication principles and techniques, MEMS sensors and actuators fabrication and applications, on-chip networks and network-on-chip (NoC), microfluidic- and nanofluidic devices.

It is solicited submissions of both original research papers and review articles for this special issue.

Keywords

- Design principles and fabrication techniques of micro- and nano systems
- MEMS sensors and actuators
- Lab on chip devices
- Microfluidics and nanofluidics
- Signal processing and detection based on integrated micro- and nano systems
- Modelling and simulation in micro and nano systems
- Heat & mass transfer in micro and nano systems

Deadline for manuscript
submissions:

closed (31 December 2018)

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
