Message from the Guest Editors

Dear Colleagues,

This Special Issue is focused on advanced optical wavefront sensing for various optical systems, including the development of wavefront/non-wavefront sensing technology (e.g., sensing, reconstruction, algorithms, deep learning), wavefront-sensing-based technology (e.g., beam quality improvement, computational imaging), and device technology (e.g., meta-surface, sensors). Our scope includes all the challenges in the research and industrial fields, from microscopy optics to large-scale telescope optics.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
