Message from the Guest Editors

Sensors journal entitled “Wearable Sensors for Biomechanical Gait Analysis” will focus on all aspects of research and development related to these areas. This Special Issue focuses on the development, validity, use, and applicability of wearable devices in biomechanical gait pattern identification. The broader aim is to collect high-quality papers from researchers around the world working in this area to make biomechanical gait monitoring more widespread and more effective using wearable technologies.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
