Deadline for manuscript  
submissions:

**closed (31 May 2020)**

### **Message from the Guest Editor**

Dear Colleagues,

With the renaissance of electrochemical methods and electrochemical (bio)sensors, more and more of them are being developed for medical applications, smart textiles, and the food industry. For such applications, the safe use of biosensors is very important. Therefore, naturally occurring compounds are very important since they typically have the lowest toxicity when used in vitro or in vivo.

Other naturally occurring compounds are usually used in the of electrochemical biosensors, increasing the electroactive area and the electron transfer. The investigation and application of naturally existing compounds, including enzymes, antibodies and other biological molecules, can be also used to prepare whole electrochemical biosensors. The investigation and characterization of such kinds of compounds in biosensing is important for applications in vitro and in vivo.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
