Message from the Guest Editors

Dear Colleagues,

This Special Issue is dedicated to Professor Jean-Louis Marty, a tireless researcher and a pioneer in the field of biosensors for pesticides and micotoxines, who retired in 2019 from his position as Professor of Biochemistry at the University of Perpignan, France. To honor his enthusiasm and endless energy, the Special Issue will gather contributions from collaborators, former students and scientists working on research areas most impacted by Professor Marty's work, more broadly described by the topic Advanced Biosensors for Food and Environmental Monitoring.

In this Special Issue we invite articles devoted to high performing nanomaterial-enabled biosensors for the detection of food and environmental contaminants. Both research papers and review articles are welcome.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
