Message from the Guest Editors

Dear Colleagues,

Modern critical systems are pervasive and quite diversified in terms of scale, whether related to factories, utility infrastructures, vehicles, or even UAVs. Nevertheless, regardless of their size or scope, such systems have one thing in common: a set of special requirements in terms of security and safety, which ultimately classify them as “critical”. This is due to the sensitive nature of the involved control processes and applications, whose malfunction, whether accidental or resulting from malicious intervention, may pose a significant risk to human lives, assets, or essential services.

With the emergence of complex application scenarios, either new or evolved from existing ones, the distributed nature of such critical systems is quickly unfolding into a massive scale. Ensuring the reliable, secure, and continuous operation of scenarios with such a scale implies the adoption of data-driven approaches that are capable of dealing with considerable amounts of information to support the dependable (semi)automated analysis and decision mechanisms such applications need to become feasible.

sensors

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
